Profile Summary

I am seeking a challenging and rewarding position in a well-established and reputable organization where I can effectively utilize my skills, knowledge, and experience. I aim to contribute meaningfully to the success of the team and the organization, while continuously learning and growing both professionally and personally. I am committed to delivering high-quality results, embracing new challenges, and evolving in a dynamic work environment that encourages innovation, collaboration, and personal development.

Education

- **B-tech in Computer science:** Roland Institute of Technology, Berhampur (2021–2025)
- **CHSE:** Sriyan H.S. School, Dharma Nagar, Berhampur (2019–2021)
- **Matriculation:** Gandu Nahak High School, Jharadi, Radhagovindapur (2018-2019)

Project (Scholarship Management System)

Developed a web-based Scholarship Management System for managing student scholarship applications and records. Implemented student registration, application submission, document verification, and scholarship approval modules. Designed the frontend using HTML, CSS, and JavaScript. Used PHP for backend development and MySQL for database management. Deployed and tested the application using Apache Server (XAMPP)

- Developed a web-based Scholarship Management System to streamline student scholarship application and record management.
- Designed and implemented student registration and login functionality for secure user access.
- Created scholarship application submission and tracking modules to improve process efficiency.
- Integrated document upload and verification features for validating applicant information.
- Developed scholarship approval workflow for efficient application processing and status management.
- Designed a user-friendly and responsive front-end using HTML, CSS, and JavaScript.
- Built backend functionalities using PHP to handle business logic and data processing.
- Managed database operations using MySQL for secure storage and retrieval of application data.
- Conducted application testing and deployment using Apache Server (XAMPP).
- Applied software development lifecycle (SDLC) principles, including design, development, testing, and deployment.

Course- Java full stack web developer at Q Edge, Hyderabad (Mar-25 to Oct-25)

- Completed comprehensive training in Java Full Stack Web Development.
- Gained hands-on experience in Core Java, Advanced Java, and Object-Oriented Programming (OOP) concepts.
- Developed dynamic and responsive web applications using HTML, CSS, JavaScript, and Bootstrap.
- Learned backend development using Java, Servlets, and JSP.
- Acquired knowledge of database design, SQL queries, and MySQL database management.
- Implemented CRUD (Create, Read, Update, Delete) operations in web applications.
- Worked with JDBC for database connectivity and data management.
- Developed and tested end-to-end web application modules following industry's best practices.
- Gained practical exposure to version control using Git and application deployment concepts.
- Strengthening problem-solving, debugging, and software development skills through real-time projects and assignments.

Technical Skills

- Programming Languages: PHP, Java, SQL
- Web Technologies: HTML, CSS, JavaScript
- Database: MySQL
- Server: Apache (XAMPP)
- Tools & IDEs: VS Code, Eclipse, Git
- Concepts: OOP, DBMS, Data Structures, Problem Solving

Soft Skills

Quick Learner, Team Player, Communication Skills, Problem Solving, Time Management & Adaptability

Language Known

English (Fluent), Hindi (Proficient), Odia (Native)
